

The TCGi Equipment Leasing and Financing solution offers customized leasing programs that minimizes risk, delivers robust asset tracking, and reduces total cost of ownership.

Key Benefits of the TCGi Leasing and Financing Solution

- ◆ Significant savings incurred within the first year
- ◆ Leasing of IT assets is more agile and based on your corporate need
- ◆ Choice of type and terms of lease i.e. capital vs operating, accelerated, decelerated or level
- ◆ Adaptable end of lease options i.e. to own, return or upgrade equipment
- ◆ Convert spend to Tier 1 diverse

TCGi Delivers Results

Improved Management of Capital Spending

Comprehensive review of IT and Procurement plans is performed to produce detailed assessment of projected capital acquisitions so better buying strategies can be deployed.

Optimized Payment Plans

Leasing and Financing terms are evaluated and renegotiated where necessary; future needs are planned and acquisitions planned and managed for optimal results.

Greater Control of Leased IT Assets

Location and status of all leased assets is determined to facilitate planning for budgets and end-of-life options.

Flexible End-of-Life Options

Lifecycle management is supported with options that can be utilized based on changing business needs.
