

The TCGi Software Asset Management solution is a full scale SaaS approach to software asset management that allows IT organizations to function more efficiently, helps prevent unbudgeted true-ups and reduces time and cost required for audits.

Key Benefits of the TCGi Software Asset Management Solution

- ◆ A single platform that follows the lifecycle of your licenses for easy management, reduced exposure and spend optimization
- ◆ Analytics and insights provide for informed and improved IT leasing and purchasing decisions
- ◆ License compliance governance is ensured with implementation of Best Practices processes

TCGi Delivers Results

Greater Control of IT Assets

Proactive management of your organization's installed and licensed software applications throughout the product lifecycle: purchase, deployment, maintenance, utilization and disposal across all devices (desktops, datacenter, virtualization, cloud, etc.) throughout the entire company

- ◆ Asset Tracking
- ◆ Compliance Management
- ◆ Maintenance Management

Reduced Costs

- ◆ Maximized utilization of software assets to reduce licensing expenses
- ◆ Minimized compliance liability and risk, reducing costs associated with lengthy audit preparation, fees, fines and unbudgeted true-up expenses

Greater Visibility

- ◆ Usage status reports configured by user, user group, geography, etc.
- ◆ Alerts for license expirations, over-utilization and unauthorized utilization
- ◆ Forecasting tools use workflow patterns, peak periods, peak users, etc.
